HCPCS Codes G0299 and G0300 Configuration and Claim Reimbursement Project Update

Please be advised IlliniCare Health is currently aware of the issues experienced with G codes (G0299 and G0300). The problem is currently being corrected and a project has been set up to cover all providers. We expect the correction to be deployed mid-August and Claim Projects to follow soon after.

Please do not resubmit your claims that fall within this topic as they will be automatically reprocessed.

If you have further questions regarding these issues and/or project updates, please contact your Provider Relations representative.
