Billing Code Issue with MedroxyProgesterone

IlliniCare Health has identified an issue regarding the billing of the generic form of birth control known as MedroxyProgesterone. Based on meetings with our provider community and review of [CMS.gov](https://www.cms.gov) and [ReimbursementCodes.com](https://www.reimbursementcodes.com) we have found inconsistencies on the correct billing of the J Code – NDC combination (J1055 vs. J1050) for this drug. Due to this discrepancy, IlliniCare Health has relaxed the NDC edit on this billing code, allowing J1050 to be accepted. This arrangement will be in place until CMS and/or ReimbursementCodes.com has updated their billing code listing for MedroxyProgesterone.

Please note: Providers are still required to bill according to the IlliniCare Health [NDC/J Codes Clarification](#).

If you have any questions or concerns, contact your Provider Relations Representative.
