Nursing Home Claims Denied for Admitting DX

IlliniCare Health has discovered that a new configuration edit for hospitals was turned on for Nursing Homes incorrectly. The edit was denying claims with an explanation code of 4a (DENY: ADMITTING DIAGNOSIS MISSING OR INVALID).

This edit has now been turned off for nursing homes and any claim that has denied incorrectly will be reprocessed to remove the edit/denial. Please expect a reprocessing timeline of anywhere between **2 weeks to 45 days** for completion.

If you have any questions, please connect with your Provider Relations representative.
