### **Type of Bill Changes**

IlliniCare Health has discovered a system issue when providers submit corrected claims and change the type of bill (FL04 of the UB04/CMS1450). The current system configuration will revert the type of bill back to the original, which may cause the claims to be denied.

For example, if a facility bills a type of bill 651 (intermediate care) on the original claim and submits a corrected claim of type of bill 217 (skilled nursing) the error in the configuration will keep the original bill type of 651.

Our IT and configuration team is currently working on a solution. While we are correcting this issue, please submit change of type of bill as a first time claim to avoid any possible denials due to type of bill.

This issue is mostly effecting our Nursing Home community as the new billing requirements are tied directly to type of bill.

As always, we value the care you provide to our members and if you have any questions, please feel free to connect with your Provider Relations representative.
